About the event

We are pleased to announce the highly anticipated virtual E- Asia Derma Conference 2021 will be held from 1 - 3 September 2021 as an Online event.

COVID-19 has impacted the way continuous learning and training are being conducted globally, and online learning is the way moving forward. Dermatology and Aesthetics medical fields are no exception either.

Dermatology is a rapidly evolving field of medicine and considering the recent development in scientific and technological basic research of the skin, the fields of dermatology and aesthetics, we need to stay relevant with these developments in our field. We need to work together, learn from each other, and think of better solutions and approaches to advance the development and future of dermatology.

The Online Scientific Conference will enable participants to interact amongst peers through keynote presentations, exchange of ideas over debates / panel discussions and acquiring of new skills. The virtual platform will provide opportunities for wider networking among dermatologists and industry professionals in the related field regardless of geographic locations.

The theme for this year's Conference is: **"Staying Updated and Relevant in Dermatology through a Pandemic".**

The Scientific Programme will be helmed by some of the best regional and international minds and faculty experts in the medical and aesthetic dermatology. E- Asia Derma Conference promises 3 days full of comprehensive content, interesting dialogue, skills development opportunities, keynote presentations and great insights.

E-Asia Derma Conference is the platform for continuous learning and networking opportunities, where regional and international expertise will meet to address scientific developments and new technologies in both medical and aesthetic fields of dermatology.

We look forward to welcoming you to E-Asia Derma Conference, the Unique Online Asia-Pacific Dermatology & Aesthetic Conference.
