One of the challenges of current management of psoriasis is the inability to accurately predict treatment responses of psoriasis biologics in individual patients. IL-17 antagonists induce impressive clinical benefits in psoriasis, but it is unknown to what extent cellular and molecular psoriasis characteristics are suppressed by a clinically relevant schedule of any IL-17-receptor antagonist. This webinar will highlight the evidence of gene-expression profiling in psoriasis to guide clinical pathways.

Meet our Expert Panel

Keynote speaker, expert panelist

Prof. James G. Krueger,
M.D., Ph.D.

D. Martin Carter Professor in Clinical Investigation
Senior Attending Physician and Laboratory Head, Investigative Dermatology
Co-director, Center for Clinical and Translational Science
Chief Executive Officer, The Rockefeller University Hospital

See Bio

Chairperson, expert panelist

Assoc. Prof. Siew Eng Choon,
FRCP

Associate Professor, School of Medicine and Health Sciences, Monash University Malaysia

Senior consultant dermatologist at Hospital Sultanah Aminah, Malaysia

See Bio

Expert panelist

Prof. Wen-Hung Chung,
M.D., Ph.D.

Professor at the Chang Gung University, School of Medicine & Director of Department of Dermatology, Chang Gung Memorial Hospital, Taipei

Director of Whole-Genome Research Core Laboratory of Human Diseases, Chang Gung Memorial Hospital, Taiwan
