

May 8, 2023

To Whom It May Concern,

Dr. Sheng-Pei Wang had worked in my lab at the University of Southern California as a visiting scholar during July 1, 2018 to February 12, 2020. The project that she worked on during her stay explored the roles of epigenetics in regulating wound repair and regeneration. Wound healing is one of the major topics in the field of dermatology. Dr. Wang's work contributes to our understanding of wound healing and is beneficial to dermatological society and patients.

Sincerely yours,

Cheng-Ming Chuong, MD, PhD  
Professor of Pathology  
Univ. Southern California
